

# Step Out at SWFC

## The Wednesday Walk on Thursdays

### Walk 74 – Broomhead & Rocher Bottom - 3.2 miles, bit of climbing

Park at the West end of More Hall reservoir. (For a slightly shorter version park on New Road or beside Broomhead Bridge and walk across the dam)

Clockwise:

Follow the road round the end of More Hall reservoir then turn right up the footpath. Climb to the dam top, then find a footpath which bears off to the left (uphill) through the trees. At the top of the wood, you will emerge onto Rocher Bottom; turn right and follow round a couple of bends. Where the road bends right, find a footpath straight ahead.

When this path comes out onto the road, go straight ahead till the road bends sharp right; just round this bend, turn left down the BOAT. At the junction turn right and follow the path through to New Road. As you join the road, cross over and join the footpath, turning left till it emerges onto the road by Broomhead Bridge. Cross the bridge and rejoin the footpath, which you can follow right back to the dam.

Bear left and follow the road back to the minibus.

Risks:

- Road walking – traffic can be moving fast, and there are no pavements.
- Water – in places you are very close to the water (it may flood over the path on the North side).
- Mud – even in summer.
- Tree Roots and uneven surfaces

See route 12 for a shorter, flatter walk (2.7 miles, no hills)
